

AWS Generative AI For Executives

Overview

In this course, you will learn how to leverage generative artificial intelligence (AI) within your organization. We'll cover how to drive business value with generative AI, the use cases across various industries, and the considerations to implement generative AI safely and responsibly. The goal of this course is to provide you with the fundamental concepts and tools you'll need to successfully lead generative AI initiatives within your organization.

Course Objectives

In this course, you will learn to:

- Recognize the potential business value of generative AI
- Identify real world use cases that you can implement today
- Manage the people, process, and technology changes needed to be successful
- Use generative AI safely and responsibly
- Identify the specific steps you can take to get started with generative AI
